*Parenting with Love and Logic is a curriculum that helps parents be authorities in the home without becoming drill sergeants or helicopters to our kids. It is about taking good care of ourselves by allowing children to own more of their decisions (the good ones and the bad ones) so that our empathy and the consequences do the teaching. It helps us enjoy our families by building respectful relationships and creating a sense of belonging and responsibility in children.*

*We deserve support as parents in this ever more challenging world. All questions are welcome.*
